

STUDENT PLACEMENT NEWS

ISSUE NO 2 / OCTOBER 2023

Here at HSC, we pride ourselves on welcoming nursing students in every program. Often, we look to new areas to highlight places to work. This past summer the **Renal Program hosted nursing students** from the University of Manitoba for a full day during their medicine rotation. The Educators prepared a day of learning and will expand to having a clinical group this fall. They are keen to open their doors to the student experience, including senior practicums.

Every nurse has a role in the professional development of current and future nurses. Building a sustainable workforce requires a culture that embraces opportunities to precept and mentor students and nurses. **GD3 has taken this to the next level**, each of the nurses pictured has both been precepted and has been a preceptor on that unit.

What Opportunities We Share in Career Development

STAFF STORY

What our staff are saying

Not only do I get to share my knowledge and experiences with the students but I learn from them as well - they keep me on my toes. I take pride when I observe how much the students grow during their clinical rotation. Many of them have decided to either do their practicum on WN5 or within the Women's Health Program; many are now my colleagues. How awesome is that, that I get to work alongside them as they transition from students to registered nurses!

Marita Dreger RNBN WN5

STUDENT STORY

What our students are saying

My time at Health Sciences Centre was unique. This was my first hands on experience as a nurse, and though it could quickly become overwhelming, having HSC provided a safe space for trial and error, in which mistakes are seen as an opportunity for growth, not discouragement. Communicating across different units gave me insight to a variety of perspectives on how a hospital runs effectively. Saturdays at 6:30AM turned out to be my favourite day of the week, and I am eager to hopefully return to HSC to begin my nursing career in the future.

Jenna Dziadyk, Nursing Year 2
Red River College
