

**Health Sciences Centre
Winnipeg**
A Shared Health facility

Grow your CAREER

**Opportunities exist for full-time, part-time
and casual nursing positions.**

Health Science Centre Winnipeg's Ambulatory Care Program

Enhance your skills and health system knowledge in an environment where you will support clients with their medical care, treatments and procedures with the goal of decreasing the need for a hospital admission.

Join the Ambulatory Care program and provide diverse and comprehensive treatment for a wide range of diagnoses at one of the many Ambulatory Care clinics located at HSC.

Expand your knowledge in clinics and procedure areas that support health promotion and disease prevention while partnering with patients to optimize their health.

Build on your nursing skills and theory in specialty areas like Women's Health, Pediatrics, Medicine, and Surgery and more.

Work as part of an interdisciplinary teams alongside nurses, nurse practitioners, allied health professionals, physicians, physician assistants, Indigenous Health professionals, and support staff.

HSC Ambulatory Care Program

I love working in a role that allows me to support patient care holistically through health education, navigation and chronic illness management. Our team of nurses, doctors and allied health professionals work collaboratively to strategize and develop individualized and specialized care plans for our patients and families. As a nurse, I really appreciate the opportunity to collaborate with so many other professions and use my critical thinking and clinical judgement skills to make informed patient care decisions.

– Kathy Gawlik, IMID Nurse Clinician, Adult Ambulatory Care
