Education and Orientation

- Supportive orientation includes 10-15 buddied shifts for all hires
- Staged progression through lower to high acuity areas of the ED, including:
 - Level 1 - a two-week training program through a combination of in- person, independent, virtual and skills lab training , covering broad emergency nursing topics.
 - Level 2 - learning to care for higher acuity, more complex emergency patients, includes rhythm analysis for cardiac monitoring
 - Level 3 - Resuscitation – Caring for complex, critically ill patients; including: intubated patients, stroke, major traumas, cardiac arrest, respiratory emergencies, shock and more
 - Advanced Cardiac Life Support (ACLS) – Learn defibrillation, cardioversion, cardiac pacing and the anatomy of running a code blue
 - Triage and CTAS (Canadian Triage Acuity Score)- learn the art of managing a busy waiting room and prioritizing the sickest patient
 - Annual 8-hour, in-person emergency education day, including Annual BLS certification
 - Trauma Nursing Core Course (TNCC) – an internationally accredited two-day practical course in emergency trauma nursing

"We want to create an environment that says 'Come here, this is a safe space and you are welcome here'."

– Lula Fesehaye, Nurse, HSC Adult Emergency Department

Lula Fesehaye began her career in nursing a decade ago, working first in a medicine unit at Health Sciences Centre (HSC) Winnipeg before accepting a six-month term assignment in HSC's Emergency Department to "see what it was like." For Lula, the experience gained during those six months confirmed that emergency was, for her, the right fit.

"It's not without its challenges, said Lula, referring to the volumes and pace that ED staff deal with every day. "But I really enjoy my work, this is home for me."

About HSC Winnipeg

HSC Winnipeg is Manitoba's hospital — a Shared Health facility with specialized support for trauma, transplants, burns, sexual assault nurse examination, neurosciences, complex cancer care, neonatal and pediatric care. The majority of Manitobans' tertiary care is provided here, regardless of which community our patients call home.
