

Grow your career in HSC Women's

Opened in 2019, Women's Health services are provided in a large, modern and bright facility with single patient rooms, decentralized care stations, modern communication technology, and easy access to other areas of the HSC campus.

Providing patient-centered care for all women and families in an environment that is welcoming, safe, and inclusive.

**Melissa Oliveira,
RN, HSC Women's Surgery
Clinical Education Facilitator,
Red River College Polytech**

The teamwork and support here is unmatched, there is ALWAYS someone willing to help or answer questions and that creates a learning environment that is so positive, for the students, for our patients, and for all members of our team.

HSC's Women's Health Program serves the unique needs of women throughout their life cycle, from childbirth and newborn care, ambulatory care, and gynecological surgical care.

Our dedicated inter-professional teams support patients from across Manitoba, Northwestern Ontario and Nunavut.

As a vital member of this team you will work with physicians, clinical assistants, physician assistants, midwives, social workers, dieticians, spiritual care clinicians, Indigenous Health providers, pharmacists, and more!

More than 5000 babies are born here each year.

Highly skilled clinical teams perform more than 7000 gynecological surgeries each year.

We see more than 29,000 ambulatory care patient visits each year

Facilitator

Become a Nurse at HSC Women's

Serving women throughout their lifetime.

From childbirth and newborn care, ambulatory care, and gynecological surgical care.

“WNS is a unit that's special to my heart. It's not only a really interesting place to work with a broad patient population consisting of gynecology, oncology and antepartum patients ranging in age and experience, but it's also a unit that's extremely supportive with an amazing team mentality. You're never alone.”

Our Services

Fetal Assessment, pregnancy counseling, prenatal and gyne clinics

Colposcopy Services

Allergy clinic

Labour and Delivery

NICU

Day Surgery

Our Facility

60 bed Neonatal intensive care unit featuring 5 clinical pods

54 private mother and baby patient rooms

39 single patient gyne antepartum rooms

Spiritual and ceremonial rooms and a roof top garden

Orientation, Mentorship, Continued Education

Nurses working in Women's Health have the opportunity to learn and grow in their nursing career across a number of different areas. Educational opportunities including neonatal resuscitation, operating room training, supportive care in labour, obstetrical triage, fetal health surveillance, as well as unit specific education days developed by our clinical educators.

Our units welcome eligible nursing students to work as casual unit assistants or as undergraduate nurse employees and we offer support and mentorship every step of the way!
