

A life changing career As a Renal Health Nurse

Diverse Patients, Personalized Care.

Discover a rewarding career that will allow you to make a meaningful difference in the lives of your patients.

Expand your horizons with the Manitoba Nephrology Nursing Course (MNNC).

This course will provide you with information about the renal program, support your baseline knowledge of chronic kidney disease, its causes and complications.

MNNC graduates have a guaranteed position and supported by an inter-disciplinary team as they support essential patient care.

Enjoy flexibility in your schedule with day and evening shifts available and no nights required. Choose from 8-hour and 12-hour rotations and enjoy the certainty of having every Sunday off.

How it works

Guaranteed Job as a Renal Health Nurse: You will apply directly to your preferred unit. At HSC Winnipeg, you will apply to a renal trainee position.

Comprehensive Training: With six weeks of classroom or online learning followed by 120 hours working alongside a preceptor, you will be equipped with the skills you need to work in this specialized environment, with support each step of the way.

Accessible Education: The program blends online and classroom learning following by hands-on experience through a specialized preceptorship in the unit where you will work upon graduation. Rural and northern applicants will be given the option to travel to Winnipeg for in-person classroom learning.

Paid Training: You will be paid a full-time salary* throughout your comprehensive training. Salary commensurate with the Manitoba Nurses Union (MNU) N2 salary scale.

MANITOBA NEPHROLOGY NURSING COURSE

Working in hemodialysis really improves your skills: from assessment to critical thinking and response time, to managing many aspects of acuity and chronic health conditions with multiple patients at the same time.

Learning how to problem solve independently and as a member of a bigger team is a skill that is definitely built here and is transferable to any health setting.
