

# HSC Winnipeg Women's Hospital ON THE MOVE

9 weeks until First Patient Day

October 3, 2019

## New parkade allows families to park close to important patient services

The new HSC Winnipeg Women's Hospital underground parkade will offer patients a safe spot to park while visiting or dropping off their loved ones.

The parkade has 140 parking spots. Starting December 1, it will be accessible from Sherbrook Street. It's designed to keep patients comfortable during Winnipeg's treacherous winters and hot summers. Patients can also be dropped off under the canopy over the main entrance at 665 William Avenue.

Paid parking will be available on an hourly basis. The new space will add to the growing list of patient-priority parkades available at HSC, which also include the William Avenue Parkade, and Sherbrook Street Parkade.

There will be a limited number of on-call spots for clinical staff in the HSC Women's Parkade.

Monthly parking will not be offered. Staff parking is available in the Emily Street Parkade, Rehab Parkade, and Tecumseh Street Parkade. Those who need parking at HSC can contact the HSC Parking Office, Monday to Friday, 7:30 a.m. to 5 p.m. at 204-787-2715 or email [hscparkingoffice@hsc.mb.ca](mailto:hscparkingoffice@hsc.mb.ca)

If you're looking for other ways to commute to work, why not consider the financial and health benefits of leaving the car at home?

### Get active and bike to work

Biking to work is a great way to start and end your day. McDermot Avenue features protected east/west bike lanes.

Bicycle racks will be available at 665 William Avenue. Contact the HSC Parking Office to put your name on the wait list.

There are currently two secure bicycle parking locations for use around campus:

- *Emily Parkade*: Indoor, heated, and secure bicycle parking. Key can be obtained from the Parking Office with a deposit.
- *707 McDermot Bike Cage*: Located behind the 707 McDermot Avenue entrance. Key can be obtained from the Parking Office with a deposit.

General bicycle parking is free to use. Bike racks are located at the William Avenue Parkade, and entrances at 820 Sherbrook Street, 735 McDermot Avenue, and 700 William Avenue.

Bike Winnipeg has great resources on planning the quickest, safest and best ride for everyone. Bike to Work Day, Bike Week and the Commuter Challenge are excellent ways to try a new commuting option\*.

### Carpool

Share the ride and enjoy being stuck in traffic with good

### October 4

- Women's Health Day 1 training
- NICU Day 1 training

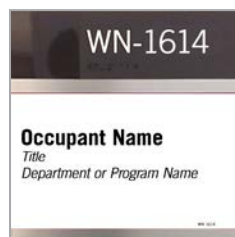

### October 7

- NICU Day 1 training
- Women's Health Day 2 training  
- Labour and Delivery

## Room names and numbers

Room naming and numbering at 665 William meets current provincial accessibility standards and follows the same formatting as the rest of the HSC campus. Each room has a plate at the doorway with the room number and details.

**Room plates** have two main features:

1. Top plate with permanent facility room number molded in large white type and raised braille

The number on this plate consists of the two-letter code assigned to the building\*, followed by the four-digit designation for that particular room. (The first digit is the same as the building level.)

This number is listed in the permanent room inventory system for the entire campus (Archibus). Maintenance, housekeeping, security and emergency response teams reference this number.

### 2. Plexi-glass "slider" window with room details

The slider inserts can easily be changed if the room is repurposed for another occupant or usage. This section displays room details as follows:

- Clinics have the exam room or bed number, clinic symbol (for ACC), and level;
- Offices have the occupant's name and/or title and department.

**Bed numbers** are indicated with a cling-vinyl type sign which includes the name of the unit.

\*The two-letter code for 665 William Avenue is "WN" for "Women and Newborns"

## Tours – Mark your calendar!

Tour dates have been confirmed for the new HSC Winnipeg Women's Hospital at 665 William Ave.

This is your chance to get an exclusive look at our state-of-the-art facility before the First Patient Day on December 1.
